Experience

| Company         | Role                     | Year of Experience |
|-----------------|--------------------------|--------------------|
| Wissen Infotech | Junior Software Engineer | Jan 2022 – Present |

Summary

- 2.9 year of Experience in designing, developing, and maintaining scalable and modular user interfaces using Angular within a micro front-end architecture.
- Strong proficiency in TypeScript and JavaScript, with a deep understanding of Angular architecture and its core principles.
- Experience in implementing internationalization (i18n) features in Angular apps for multilingual support.
- Familiarity with RESTful APIs and asynchronous programming, ensuring seamless communication between frontend and backend systems.
- Experience with libraries like D3.js or Chart.js for creating interactive data visualizations on the web
- Expertise in version control systems like Git, bitbucket managing codebase and facilitating collaborative development.
- Collaborating with UX/UI designers to ensure accurate translation of designs into code. Optimize website appearance for various devices and browsers.
- Proficient in handling multiple technologies and tools, with a strong ability to tackle complex subjects.
- Experienced in Agile software development principles and practices.
- Worked in Agile development environments, participating in sprint planning, daily stand-ups, and using Agile tools such as Jira.
- Experience in client calls, communicating technical concepts, gathering requirements, and providing project updates effectively.
- Experienced in managing QA, UAT, and production deployment processes, ensuring seamless transitions into production environments.
- Enthusiastic about staying updated with the latest Angular features, best practices, and industry trends through self-learning and professional development.

Skills

- **HTML/CSS** - Solid knowledge of HTML5 and CSS3 for structuring and styling Angular applications.
- **JavaScript/ES6** - Familiarity with JavaScript and modern ES6+ features that TypeScript builds upon.
- **TypeScript** - Skilled in leveraging TypeScript's static typing to catch errors and improve code quality.
- **Angular CLI** - Experienced using Angular CLI for project scaffolding, dependency management, and building production-ready applications.
- **State Management** - Familiarity with state management patterns and libraries in Angular Rx-JS.
- **Responsive Design** - Ability to design and develop responsive and mobile-first web pages using frameworks like Bootstrap, or custom CSS solutions.

Tools

- Code Editors: Visual Studio Code.
- Version Control: GitHub, GitLab, and Bitbucket.

Project 1: [Tila International Recharge Application]

- Tila International Recharge Application, a platform focused on providing seamless international and domestic recharge services.
- The app supports a variety of recharge types, including international, domestic, and pinless with primary target audience in the USA.
- The solution aimed to simplify the process of mobile recharges and facilitate real-time transactions for users across different countries.

Project 2: [Consumer Portal]

- This app allows users to quickly and securely recharge both international and domestic services, with a particular focus on the USA.
- Key features include the ability to add a credit card for seamless payments or choose from alternative payment methods like PayPal and Google Pay. Users can earn reward points with each recharge, encouraging ongoing engagement.
- The app also offers an auto top-up feature, enabling users to schedule automatic recharges for added convenience. With its unique blend of user-friendly design, reward-based incentives, and flexible payment option.

Project 3: [Ngx-Super-Admin]

- NGX-super-admin application is built with angular-v16 and firebase v-7.6.1. This application covers core of concepts of angular curd operations, Routing, Signals, Reactive forms, form validations google login much more.

Project 4: [Game-Hub]

- Game hub is video game discovery react application this is a mini version of the rawg website. This app includes search, filter, sorting dark mode and light mode functionality.

Project 5: [Movie- streamer]

- Movie-streamer application is built with Angular v17, this application Provides detailed information about each movie, including synopsis, cast, and ratings much more.

Academic Qualification

MCA 2021: Hindustan University with aggregate 82%.

I hereby declare that the information stated above is true to the best of my knowledge
